

## *Interference*

*Cheryl Sourkes – Clip 11*

Another body of work that's in this series is called *Interference* and *Interference* again it got made kind of semi-unconsciously. I was saving many, many images and I had a folder called anomalies that I put in things that came out that defied my expectation and when I thought about it, it defied the expectation of the people who mounted the camera as well. It's reflections or rain or frost that appear on cameras or camera housing that turn up in the image, that interfere with the smooth transmission of the image and I kind of thought of those as contestations of public space.
